CLEVELAND'S HANDY AXE.

President Cleveland is exercising the privilege of the very wise man in doing an apparently very foolish thing. The dinary intellect cannot but condemn as olish the man who chops off an objectionable limb by sitting on it and plying the axe between himself and the trunk. And yet it is conceivable that a very wise and learned man could do that thing with perfect safety. He might have a flying machine in his pocket, or he might have discovered an antidote enable him to remain seated comfortably in midair after the severed limb fel

So it is impossible for men of only average intellect to say positively that President Cleveland is doing an unwise political act in cutting off the limb which is Senator Hill's salvation, himself being perched upon the same limb. It is possible that President Cleveland in his mighty wisdom, knows of some process by which the New York limb can be chopped from the tree of Democ-racy and the New York President not

Perhaps in the manipulation of his axe upon the scrub pines at Gray Gables the President has discovered an occult means of chopping off a limb and leaving it on the tree at one and the same

Perhaps he can destroy the Demo ratic party in New York and at the same time preserve the New York

People who lack the intellectual development which so characterizes the President should refrain from criticising an act which they perhaps do not understand, and hold their breaths until the

GO DEEP, MR. GOFF.

Yesterday's examination of Police ommissioner Sheehan by the Lexow ommittee was much more satisfactory than the first day's and fully justifies the persistent demand of "The World" that Mr. Goff should "go higher" than "lower strata" of police misconduct and crime.

Commissioner Sheehan was questioned as to the sale of appointments on the force. This is what the people want to know. They care nothing about Mr. Sheehan's Long Island contracts, nor about the income he derives from his about the income he derives from his license. Dr. Parkhurst can shake law business, nor about his familiarity hands with himself and feel the thrill with the location of station-houses, nor of conscio about his opinion as to Inspector Williams's qualifications as a police officer. But they do want to know what Mr Sheehan and the other "higher" officials of the Department know abo iminal acts of the members of the

Mr. Sheehan testifies that he believed, as every one else did, the pool-rooms were paying for "protection" long before they were finally closed. He made personal inquiries that satisfied him of the fact, but no official steps were taken to

vestigate the matter. Now, the people want to know without any other "high" official has been re ceiving any of the money raised by blackmail or the sale of appointments On with the good work, Mr. Goff! My pretty Louise did not touch the harp gently, but shot into houses and stores, filled the depot full of lead from her revolvers and rifle, defied a squad of deputy marshals to come and arrest her and then rode out of the place in safety. Her raid was intended to show the ople what they might expect if any narm came to her interesting brothers. Talk about the bonnie Louise being unfit to vote! A woman who can scatter bullets all around must surely be fit to cast a ballos.

THIRD DAY'S REGISTRY.

The registration yesterday was not so arge in this city as was expected, but it eached a fair figure nevertheless. WELL PLEASED WITH CLEVELAND.

Thomas C. Platt is chuckling at his andiate's headquarters over the fallure of President Cleveland to manifest an interest in the election by registering and voting for his party, or to utter a word in favor of Senator Hill's success. THE MEANING OF DREAMS.

This Intensely Interesting Subject. The whole earth's the realm of the fair.

In reply to a letter signed "Winnette," askin what causes dreams. I'd like to may this: Dreams are by no means the result of an overworked mind. Great men claim that an overworked mind will often cause baldness of the head, but not dreams. Yet, I would admit that some dreams are due to a restless mind. There are, I have heard, three kinds of dreams which occur at di ferent parts of the night. One kind occurs ju as soon as you fall asleep. Those dreams are of no account at all. Another kind of dream oc-curs at midnight, In the midnight dreams you will often see your dead friends. They are full of tragedy. You will often dream you are getting drowned, burned, killed, &c., and you will also often see diabolical and weird phantoms in the midnight dreams. These sights are due to a very peculiar reason, which I should expect the reader to understand himself. The third kind occurs in the morning before you awake. The dreams are said to be predictions of the future, and have often proved to be very true, although you cannot depend upon them, and they are said to be brought by an angel, who is created and exists for this purpose exclusively. We also find a number of dreams in the Old Testaiment by Jacob, Joseph and Pharoh and many others, and seen dreams which proved to be of some conse-quence to me. think every morning dream has some meaning, but we don't know it.
